

Author index of Journal of Ophthalmology issues in 2017

Clinical Ophthalmology

Akhundova L.A., Kerimov M.I. Comparison study of results of vitrectomy and vitrectomy with scleral buckling for the treatment of patients with rhegmatogenous retinal detachment at high risk proliferative vitreoretinopathy. *J.ophthalmol.(Ukraine).*2017;4:14-19.

Bezdetko P.A., Ivzhenko L.I. Character of meibomian gland dysfunction in patients with diabetic polyneuropathy with severe complications. *J.ophthalmol.(Ukraine).*2017;5:15-20.

Blavatska O.M., Kustryn T.B., Korol A.R. Comparison of intravitreal ranibizumab and aflibercept in patients with choroidal neovascularization in pathologic myopia. *J.ophthalmol.(Ukraine).*2017;5:34-38.

Bobrova N.F., Sorochinskaya T.A., Sukhodoeva L.A., Ivanitskaya E.V., Bakhmatskaya N.I., Levitsky I.M. Retinal injuries secondary to consumer laser devices in children. *J.ophthalmol.(Ukraine).*2017;3:37-42.

Bondar N.I. Autolimbic grafting in penetrating ocular injuries with limbal involvement. *J.ophthalmol.(Ukraine).*2017;4:27-30.

Chornobai M. O. The level of pediatric cataract in regions according to data of Ministry of Health of Ukraine for 2007-2016 years. *J.ophthalmol.(Ukraine).*2017;6:20-24.

Drozhzhyna G.I., Pavlovskii M.I. Characteristics of dry eye syndrome in patients with subclinical and manifest hypothyroidism. *J.ophthalmol.(Ukraine).*2017;3:30-36.

Drozhzhyna G.I., Sereda E.V., Gaydamaka T.B., Molodaia A.L. Efficacy of using antibacterial fusidic acid drops in patients with red eye. *J.ophthalmol.(Ukraine).*2017;1:34-37.

Fedchenko S.A., Zadorozhnyy O.S., Korol A.R. Efficacy of 577-nm retinal pigment epithelium laser photocoagulation in age-related maculopathy patients with various extents of morphological and functional loss. *J.ophthalmol.(Ukraine).*2017;5:45-49.

Guzun O.V., Korol A.R. Quality of life in patients with AMD after laser stimulation of the retina with subsequent nutrient supplementation. *J.ophthalmol.(Ukraine).*2017;2:25-32.

Hudz A.S., Mogilevskyy S.Iu., Maksymtsiv M.L. Functional status of platelets in type 2 diabetes patients showing no diabetic fundus changes. *J.ophthalmol.(Ukraine).*2017;1:20-24.

Iakymenko S.A., Khrustaliyova E.A., Buznyk O.I., Kostenko P.O., Molodaia A.L., Dolenko L.V. Current antibacterial therapy for ocular burns. *J.ophthalmol.(Ukraine).*2017;2:44-50.

Ivanovskaia E.V., Khramenko N.I., Drozhzhyna G.I. Ocular hemodynamics in patients with stage I-IV keratoconus. *J.ophthalmol.(Ukraine).*2017;3:3-8.

Katsan S.V., Zaichko E.S. Changes in incidence rates of retinopathy of prematurity in Odessa region in the years of 2009 to 2016. *J.ophthalmol.(Ukraine).*2017;5:21-25.

Kerimov M.I. Changes in the retinal thickness after microinvasive vitrectomy with inner limiting membrane removal in patients with diabetic retinopathy. *J.ophthalmol.(Ukraine).*2017;5:26-33.

Kerimov M.I., Kasimov E.M., Aliyeva I.J. Incidence, risk factors and results of treatment of rhegmatogenous retinal detachment after 23 gauge vitrectomy in proliferative diabetic retinopathy. *J.ophthalmol.(Ukraine).*2017;3:20-29.

Khramenko N.I., Ponomarchuk A.V., Slobodianik S.B. Bioelectric activity of the visual system in trichromats and color-blinds according to visual evoked potentials to achromatic and chromatic stimuli. *J.ophthalmol.(Ukraine).*2017;4:20-26.

Kovtun M.I., Kochina M.L. Prediction of inpatient treatment duration for cataract patients according to their clinical and social status. *J.ophthalmol.(Ukraine).*2017;1:9-15.

Kovtun M.I., Lapkina I.I., Kochina M.L. Indications for inpatient treatment of cataract. *J.ophthalmol.(Ukraine).*2017;2:38-43.

Kustryn T.B. Influence of the morphology metrics of serous PED in AMD on the success of triamcinolone acetonide monotherapy. *J.ophthalmol.(Ukraine).*2017;1:3-8.

Malachkova N.V., Kyryliuk M.L., Komarovska I.V. Association between serum resistin level and diabetic retinopathy in obese patients with type 2 diabetes mellitus. *J.ophthalmol.(Ukraine).*2017;4:9-13.

Malachkova N.V., Kyryliuk M.L., Komarovska I.V. Serum adiponectin levels in obese type 2 diabetic patients with diabetic retinopathy. *J.ophthalmol.(Ukraine).*2017;5:39-44.

Mazur V.P., Boichuk I.M. Changes in the neuromuscular system of the lateral extraocular muscles after electrical stimulation of the lateral rectus muscle in children with nonaccommodative comitant esotropia. *J.ophthalmol.(Ukraine).*2017;5:3-7.

Mel'nik V.O. Investigation of optical density of aqueous humor samples from patients with combined cataract and POAG and those with cataract only with the use of spectroscopy. *J.ophthalmol.(Ukraine).*2017;6:11-15.

Mogilevskyy S.Iu., Bushuieva O. V. Predicting the development of diabetic retinopathy based on identification of rs759853 and rs9640883 in the AKR1B1 gene. *J.ophthalmol.(Ukraine).*2017;4:3-8.

Mogilevskyy S.Iu., Bushuieva O. V., Ziablitshev S.V., Natrus L.V. Relationship of the AKR1B1 rs759853 and rs9640883 with the development of diabetic retinopathy. *J.ophthalmol.(Ukraine).*2017;1:3-7.

Mogilevskyy S.Iu., Ziablitshev S.V., Denisiuk L.I. Primary open-angle glaucoma progression depending on clinical indices at presentation. *J.ophthalmol.(Ukraine).*2017;1:15-19.

Molchaniuk N.I., Buznyk O.I., Dumbrova N.E., Pasychnikova N.V. Electron microscopy structure of collagen-based corneal substitutes. *J.ophthalmol.(Ukraine).*2017;4:40-43.

Mukhina A.Yu., Boichuk I.M., Zhuravleva L.D. A new set of tables for detecting thresholds of color sensitivity in children with acquired myopia. *J.ophthalmol.(Ukraine).*2017;5:12-14.

Mukhina A.Iu., Boichuk I.M., Zhuravliova L.D. Stereovision in children with congenital myopia and in those with myopic amblyopia. *J.ophthalmol.(Ukraine).*2017;6:3-6.

Panchenko N.V., Gonchar E.N., Arustamova G.S., Pereiaslova A.S., Prihod'ko D.O., Friantseva M.V. Influence of the fetal neuropeptide complex on changes in retinal light sensitivity over time in patients with primary open-angle glaucoma. *J.ophthalmol.(Ukraine).*2017;6:16-19.

Poliakova S.I., Velichko L.N., Bogdanova A.V., Tsukanova I.V. Comparison of expression of molecular markers of peripheral blood lymphocyte activation in patients with small uveal melanoma and healthy controls. *J.ophthalmol.(Ukraine).*2017;1:25-28.

Ponomarchuk AV, Khramenko NI. Spectral light sensitivity and anomalous quotient in anomalous trichromats with protanomaly and deutanomaly. *J.ophthalmol.(Ukraine).*2017;3:43-47.

Putienko V.A., Ponomarchuk V.S. Efficacy assessment of treatment of patients with stage III primary open-angle glaucoma using a combined method (phosphene electrical stimulation and photomyostimulation). *J.ophthalmol.(Ukraine).*2017;3:9-14.

Putienko V.A., Ponomarchuk V.S. Mobility of the oculomotor system and lability of the visual analyzer in patients with primary open-angle glaucoma. *J.ophthalmol.(Ukraine).*2017;1:29-33.

Putienko V.A., Ponomarchuk V.S. Use of photomyostimulation method in treatment of patients with advanced primary open angle glaucoma. *J.ophthalmol.(Ukraine).*2017;2:33-37.

Romanova T.O. Criteria of severity for macular edema associated with retinal vein occlusion: cohort heterogeneity and efficacy evaluation of threshold and subthreshold retinal laser photocoagulation depending on the macular edema severity criteria. Part II. *J.ophthalmol.(Ukraine).*2017;6:25-31.

Romanova T.A., Kulbida M.P. Typology of macular edema associated with retinal vein occlusion: variety of pathomorphological picture of the eye fundus. Part I. *J.ophthalmol.(Ukraine).*2017;1:18-24.

Savko Snr V.V., Savko Jnr V.V. Effect of phosphocreatine on ocular hemodynamics and functional status of the macula in patients with dry age-related macular degeneration. *J.ophthalmol.(Ukraine).*2017;3:15-19.

Surova E.I., Boichuk I.M., Kolomiichuk S.G. Antioxidative status as assessed by enzymatic activity in the tear fluid and by the levels of sulfur-containing protein groups in the blood and tear fluid of myopes before and after treatment with a thiol agent. *J.ophthalmol.(Ukraine).*2017;4:31-39.

Tsybul'skaya T.E., Zavgorodnyaya N.E., Pashkova E.E. Phenotypic markers of syndrome of unspecified connective tissue dysplasia in children with acquired myopia. *J.ophthalmol.(Ukraine).*2017;1:12-17.

Veliksar T.A., Leus N.F., Gaydamaka T.B., Mikheitseva I.N., Drozhzhyna G.I., Kolomiichuk S.G. Effect of Silicone Hydrogel Contact Lenses on Stability of Cellular and Intracellular Membranes in Corneal Epithelium. *J.ophthalmol.(Ukraine).*2017;6:7-10.

Zadorozhnyy O.S., Alibet Yassine, Kryvoruchko A.S., Levytska G.V., Pasychnikova N.V. Dimensions of ciliary body structures in various axial lengths in patients with rhegmatogenous retinal detachment. *J.ophthalmol.(Ukraine).*2017;6:32-36.

Zheliznik M.B., Serdiuchenko V.I. Examination of school children's threshold exposure duration for recognition of test objects (TEDRTO) for assessment of their visual fatigue. *J.ophthalmol.(Ukraine).*2017;5:8-11.

Zherdiova N.N., Medvedovskaya N.V., Mankovsky B.N. Relationship between diabetic retinopathy and cognitive impairment in patients with type 2 diabetes mellitus. *J.ophthalmol.(Ukraine).*2017;1:8-11.

Experimental Studies

Bigun N.M., Vit V.V., Maletskiy A.P., Dubkova V.I. Responses of the rabbit's soft tissue of the orbit and periorbital area, and orbital bone structures to the introduction of the polymer composition implant and PFTE implant. *J.ophthalmol.(Ukraine).*2016;6:57-64.

Chepurnyi I.V., Kopchak A.V., Korsak A.V., Likhodievskiy V.V., Kovalchuk O.I., Olefir S.S., Zabala A.O., Chaikovskiy I.B. Morphological changes in the optic nerve after experimental injury followed by treatment with stem cells. *J.ophthalmol.(Ukraine).*2017;5:50-55.

Fedchenko S.A., Zadorozhnyy O.S., Molchaniuk N.I., Korol A.R. Comparing ultrastructural changes in the rabbit chorioretinal complex after 577-nm and 532-nm laser photocoagulation. *J.ophthalmol.(Ukraine).*2017;6:56-71.

Fedchenko S.A., Zadorozhnyy O.S., Molchaniuk N.I., Korol A.R. Ultrastructural changes in the rabbit chorioretinal complex following 577-nm laser photocoagulation. *J.ophthalmol.(Ukraine).*2017;6:56-71.

Ivachev E.A. Experimental substantiation of modified non-penetrating deep sclerectomy for primary open-angle glaucoma. *J.ophthalmol.(Ukraine).*2016;6:50-56.

Kresyun N.V., Son G.A., Godlevskii L.S. To mechanisms of retinopathy development in streptozotocin-induced diabetes against electrical stimulation of brain structures. *J.ophthalmol.(Ukraine).*2017;4:51-54.

Mikheitseva I.N., Moutasim Waleed A.R. Aldahdooh, Kolomiichuk S.G., Zhuravok Iu.A. Effect of treatment with carnosin on cataract development in experimental ocular hypertension. *J.ophthalmol.(Ukraine).*2017;3:56-62.

Moisieieva N.N., Gulevsky A.K., Gorina O.L., Seidaliieva Z.A. Effect of Oftocord gel vs Actovegin on regenerative processes following mechanical trauma to the rabbit cornea. *J.ophthalmol.(Ukraine).*2017;4:44-50.

Pasychnikova N.V., Cogan B.M., Kolomiichuk S.G. Experimental study of efficacy of intralamellar keratoplasty with corneal stromal substitute developed from decellularized porcine cornea. *J.ophthalmol.(Ukraine).*2017;3:48-55.

Savitskiy I.V., Semenko V.V., Serdiuk V.M. Metabolic correction of experimental diabetic retinopathy. *J.ophthalmol.(Ukraine).*2017;6:72-77.

Stepanova L.V., Sychev G.M., Kratasiuk V.A., Svetlova O.V. Physiological properties of fluid circulation in the crystalline lens in animals with regard to a phase of accommodation. *J.ophthalmol.(Ukraine).*2016;7:37-49.

Ulyanov V.A., Makarova M.B., Molchaniuk N.I., Ulyanova N.A., Skobeeva V.M., Chernenchenko E.A. Effect of colloidal silver nanoparticle solution instillation on the ultrastructure of the anterior corneal epithelium and stroma. *J.ophthalmol.(Ukraine).*2017;3:63-69.

Surgical Technique

Novytskyi I.Ya. The method of four-point fixation of the intraocular lens in the absence of capsular support (preliminary study). *J.ophthalmol.(Ukraine).*2017;5:56-59.

Discussion

Koshits I.N., Svetlova O.V. Adaptive myopia. Part 2. New ideas on physiological mechanisms of eye's focusing. *J.ophthalmol.(Ukraine).*2017;1:38-50.

Koshits I.N., Svetlova O.V. Adaptive myopia. Part 3. Interaction of physiological mechanisms of eye's focusing with mechanisms of acquired myopia development. *J.ophthalmol.(Ukraine).*2017;2:51-69.

Koshits I.N., Svetlova O.V., Guseva M.G., Pevko D.V., Egemberdiev M. B. Optical features of light passing through refractive structures of the eye. *J.ophthalmol.(Ukraine).*2017;4:60-73.

Rudkovskaia O.D. Keratoconus: mechanisms of development. *J.ophthalmol.(Ukraine).*2017;6:78.

Practical advice for practitioners

Serdiuchenko V.I. Causes, clinical picture and treatment of consecutive exotropia. *J.ophthalmol.(Ukraine).*2017;1:51-52.

Case Reports

Andrushkova O.O., Zhmud T.M., Malachkova N.V., Grizhimalskaia K.Iu., Iatsenko D.A. A Case Report of Takayasu's Arteritis. *J.ophthalmol.(Ukraine).*2017;2:70-73.

Brutskaia L. A. Hyperopic astigmatism and strabismus. *J.ophthalmol.(Ukraine).*2017;2:74.

Legka I.M. Case report: Treatment of vitreous hemorrhage in the presence of diabetic retinopathy. *J.ophthalmol.(Ukraine).*2017;3:70-71.

Literature Review

Zborovskaia A.V., Dorokhova A.E. Biological therapy in treatment of uveitis. Contemporary trends. J.ophtalmol.(Ukraine).2017;5:60-65.

A Page in The History

Benik D.Yu., Bobrova N.F., Aleksa D.V. Contribution of academician V.P.Filatov to reconstruction of Transfiguration Cathedral in Odessa. J.ophtalmol. (Ukraine).2017;6:79-82.

Information

Kravchenko N.I. Legal liability of medical worker for professional remedies. J.ophtalmol. (Ukraine).2017;5:66-68.

Pasychnikova N.V., Naumenko A.V., Myrnenko V.V., Stoylovska E.G., Arkusha A.Yu., Pronchenko O.V. Report on Filatov Memorial Lectures – 2017 International Scientific Conference. J.ophtalmol. (Ukraine).2017;4:74-76.

Review of “Cataract: toxic, congenital, secondary”, a monograph by N.F. Bobrova and Z. M. Skripnichenko. J.ophtalmol.(Ukraine).2017;3:72.

Obituary

To the memory of Nikolai Markovich Sergienko. J.ophtalmol.(Ukraine).2017;4:77-80.
